20 sec each

1.G2P1L1 @20 wks , k/c/o PE in first pregnancy.

All of the following predictors of PE in present pregnancy except

- A) absence of diastolic notch @24 weeks
- B) high RI in UA Doppler in second trimester
- C) average MAP >90 mmHg
- D) detection of free fetal DNA in maternal serum

Ans : A

2. Antihypertensive contraindicated in pregnancy

- A) methyl dopa
- B) labetalol
- C) hydralazine
- D) captopril.

Ans : D

3. Components of lytic cocktail or Menon regimen are all except

- A) pethidine
- B) chlorpromazine
- C) labetalol
- D) promethazine.

Ans :C

4. All are risk factors for PE except

- A) primigravida
- B) hyperplacentalosis
- C) new paternity
- D) smoking.

Ans :D

5. cardiotonic steroid is used in PE treatment

True / false. Ans :true

6. therapeutic level of MgSo₄ in eclampsia

- A) 4-7 mEq/L
- B) 1-3 mEq/L
- C) 7-10 mEq/L
- D) 6-8 mEq/L.

Ans :A

7. Dosage of aspirin in ASPRE trail

- A) 75 mg
- B) 84 mg
- C) 100 mg
- D) 150 mg.

Ans :D

8. MOA of MgSo₄ is all except

- A) membrane stabilizer
- B) neuroprotector
- C) blocks neuronal Na influx
- D) reduces motor endplate sensitivity to Ach

Ans : C

9.platelet count in class 3 Mississippi classification of HELLP syndrome is 50000

True. / False.

Ans : false

10. world pre eclampsia day

- A) Nov 14
- B) may 22
- C) March 10
- D) feb 13.

Ans B
